2 3 Prior to examination on the merits, please amend the above-identified application as follows:

IN THE CLAIMS:

1. (Amended) A detachable sealing system for media-carrying parts comprising:

a seal adjacent to a wall of a media-carrying area, which seals the sealing system when the parts are braced against one another,

wherein the parts have mutually precisely complimentary sealing surfaces, which are directly pressed onto one another to form a clearance-free seal at a contact surface, and

wherein the contact surface between the sealing surfaces is limited to a narrow area directly adjacent to the media-carrying area.

2. (Amended) The sealing system according to claim 1, wherein the contact surface has a width of 1/5,000 to 1/50 of a nominal width of the sealing system.
